Wastewater Discharge Permit Holder News

Fourth Quarter Sampling Requirements

The time is quickly approaching to fulfill Baltimore County's Wastewater Permit requirements for your second sampling submittal for the 2005 calendar year. Trace-East currently has openings available for composite sampling events before the year end. Take advantage of the cost savings and excellent service available.

CONFIDENCE

- Full service environmental analysis capabilities
- 25 years experience in high reliability test and analysis
- National and International Accreditations
- Trace has joined forces with the premier Drinking Water Laboratory in Maryland (Cassell Testing)
- Reduced annual sampling costs for permit holders
- Samplers available six days a week for emergency grab sample analysis
- Multiple data reporting formats

Full Service Analytical Capabilities

Trace Laboratories-East, a local (nationally and internationally accredited) independent testing laboratory, has expanded its analytical capabilities to include full service environmental testing. The acquisition of Cassell Testing, Maryland's premier drinking water service provider, expands our scope of EPA/Standard Methods capabilities...unmatched in the industry. Our goal has always been to provide clients with value service while maintaining the highest quality standards. This expansion, which includes the full analytical laboratory and state of the art instrumentation and sampling handling capabilities, accomplishes our goal.

Seasonal Open House

The overwhelming success of our initial open house, in August, has prompted us to again offer this insight into the internal workings of the laboratory.

We would like to extend an invitation to you and your fellow colleagues to visit our facility and witness our engineers and scientists in "action". Our staff of professionals welcome your questions and are happy to assist with any issues.

Please reply if you are interested in visiting the lab as we are planning several luncheons throughout the months of November and December. A list of possible dates will be provided upon your reply. We can also be reached via telephone, at 410-584-9099.
